(54) Title: METHOD AND APPARATUS FOR PROCESSING SUBSTRATES

(57) Abstract: Method and apparatus for processing substrates are described. An apparatus for processing a substrate according to the present invention includes a source for processing the substrate. A sensor generates a sensor signal that is related to a state of the substrate. A source controller is coupled to the sensor and is coupled to the source. The source controller generates a control signal that is related to the sensor signal and that modifies at least one operating parameter of the plasma source during the processing of the substrate.

* Special categories of cited documents :

- *A* document defining the general state of the art which is not considered to be of particular relevance
- *E* earlier document but published on or after the International filing date
- *L* document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- *O* document referring to an oral disclosure, use, exhibition or other means
- *P* document published prior to the International filing date but later than the priority date claimed

- *T* later document published after the International filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- *X* document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- *Y* document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.
- *G* document member of the same patent family
